

WHY CHOOSE US

Clear costs, confident partnership

We provide comprehensive quotations that cover the main unit, critical auxiliary components, technical commissioning, and standard installation guidance. With all costs clearly outlined, there are no unexpected fees, enabling you to demonstrate trustworthy cost transparency to your clients.

Flexible models, easier start

Beyond direct sales, we empower our distributors with diverse partnership models, including equipment leasing, installment plans, and EPC. These options significantly reduce upfront investment for end-users, allowing you to reach a broader customer base.

Faster supply, quicker launch

Our modular design and strategic inventory of key components, ensure that main units and critical parts can be dispatched within 2 – 4 weeks after contract signing. This delivery speed outperforms industry averages.

Professional handover, reliable operation

We provide a standardized delivery package that includes clear installation documentation, remote commissioning support, and technical training for distributor teams. This ensures efficient and compliant on-site deployment, minimizes operational uncertainties.

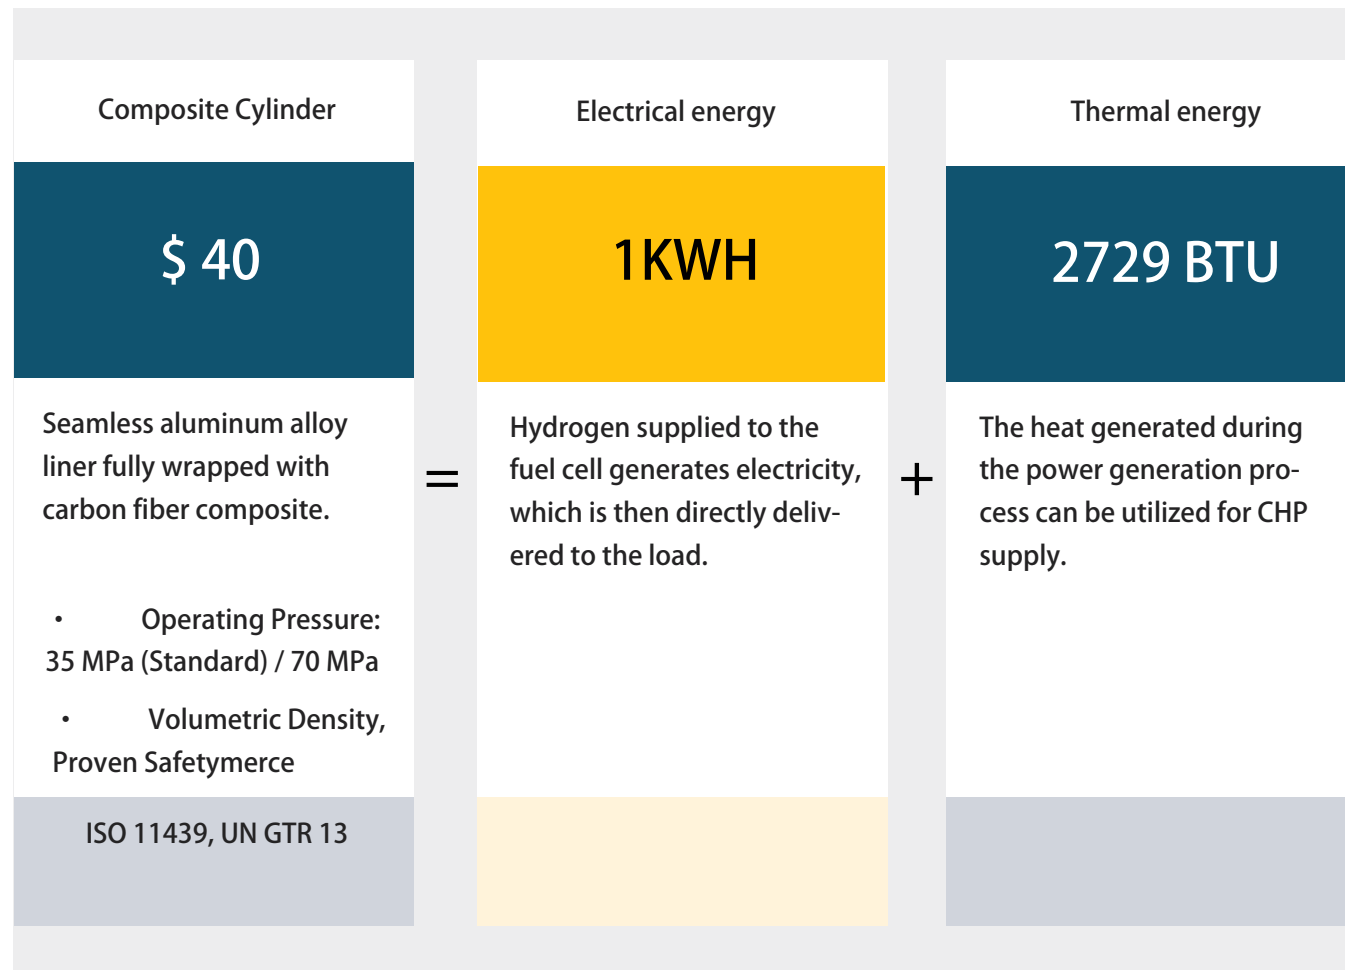

PRICE LIST

MODEL	ELS5	ELS10	EL5
Configuration			
Electrolyzer	■	■	■

Trail & Price

Month 1-6

Trail Phase

- Power equipment provided to the customer free of charge.
- If returned during or at the end of this phase, the customer only needs to cover the shipping costs.

Month 7-12

Evaluation Phase

- The customer may choose to purchase the equipment or continue evaluation.
- Purchase option: If purchased during or at the end of this phase, the price will be the market price minus depreciation for the trial period .
- Return option: If returned, the customer will pay rental fees plus shipping costs.

Price Protection Policy

We assure our valued customers that the purchase price of the equipment during both the Trial and Evaluation periods will be lower than the market price.
